

Silcoplast AG is an internationally competent manufacturer and supplier of high-quality silicone and plastic parts for various industries. Our customers are world-renowned suppliers with very high demands on quality and function.

To complete our team we are looking for a:

Design Engineer m/f

with experience in the plastics industry. As part of a well-coordinated team, you will be jointly responsible for an optimal production process and make a valuable contribution to the on-time production of our sophisticated plastic parts.

Your Tasks

- Designing injection molds
- Responsibility for equipment design
- Post-calculation of molds
- Carrying out project studies incl. calculations
- Developing technical solutions in the area of mold construction/ operating equipment
- Maintenance of tool project master data
- Observing the market for new materials, technologies and processes
- Maintenance of the CAD Systems
- Sales support

Your Profil

- Completed training as a design engineer
- Several years of practical experience in the same role in a manufacturing company, preferably in a plastics processing company
- High degree of personal responsibility and independence
- Knowledge of injection mold construction
- Communicative person with a positive attitude to life and work
- You enjoy working independently and as part of a team
- You set priorities and have a resilient personality
- Good German and English, both written and spoken
- IT skills MS-Office, ERP Abacus, IQ-Soft, CAD SolidWorks

What we offer

- An international, successful company with sustainable future prospects and a friendly work atmosphere
- A technically broad and modern environment with interesting challenges
- Development and training opportunities
- A dynamic work atmosphere
